INTRODUCTION

Congratulations on the purchase of your new AirBeatz iDOCK Bluetooth Adaptor. This manual contains important operating information. Please read all the information carefully before you use the device to avoid accidents and keep it for future reference.

CONTENTS

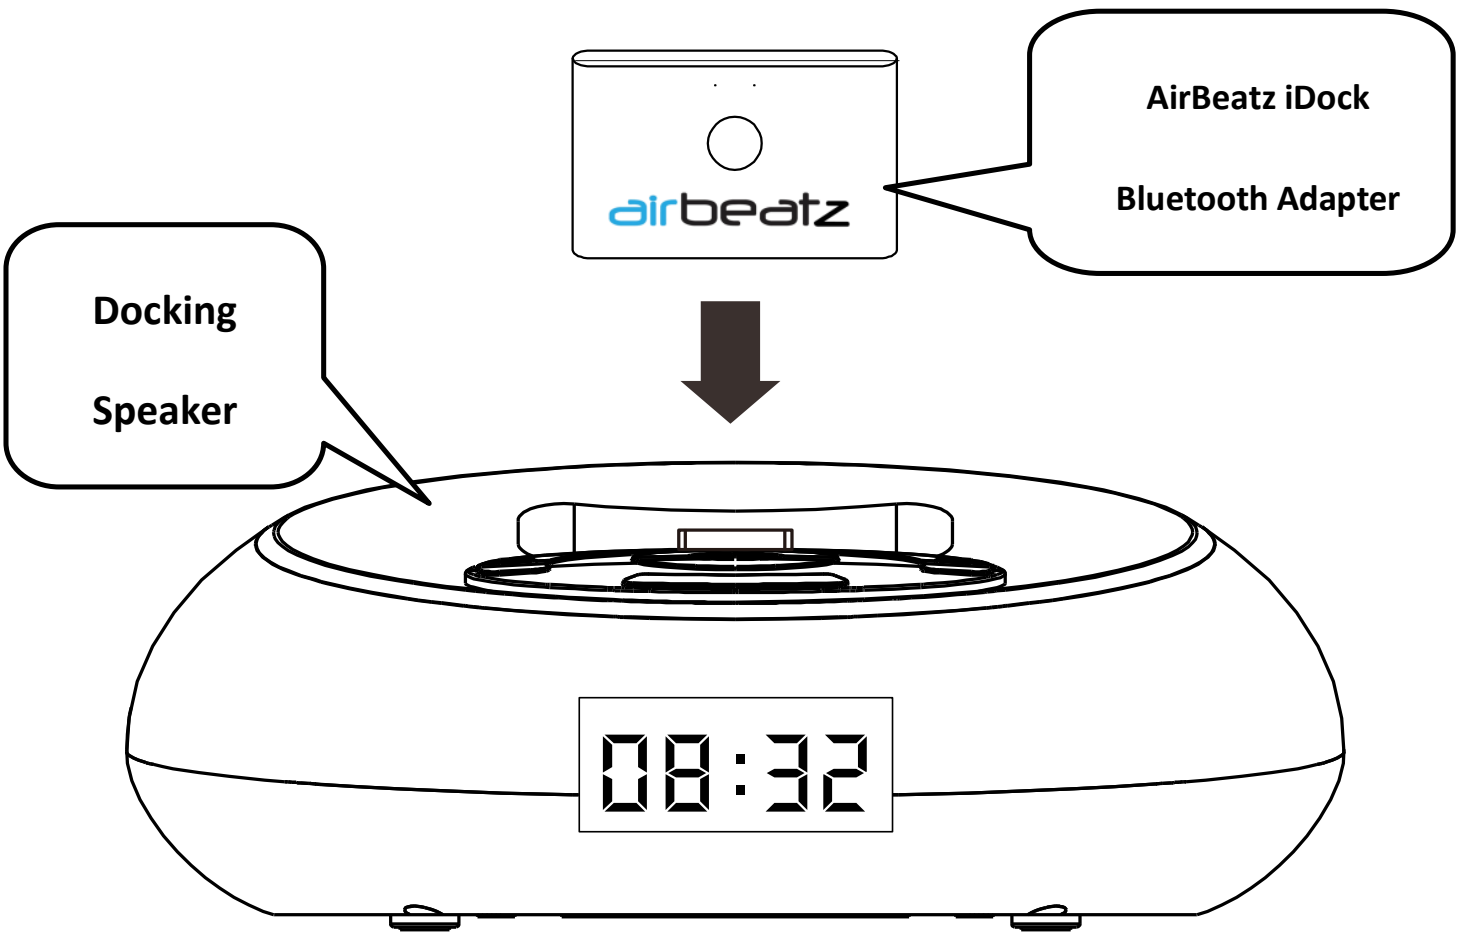
Please make sure that the items shown below are included in the package. Should an item be missing, please contact the local retailer from which you purchased this product.

1. Bluetooth Adaptor	1 piece
2. User Manual	1 piece

SPECIFICATION

- Supports Bluetooth V2.0
- Supports all devices enabled with A2DP V1.2 & AVRCP V1.4
- Up to 10m transmission range
- Compatiable with 30PIN docks

OPERATION



Pairing up with your device

1. Insert the Bluetooth adaptor to any* iPod/iPhone/iPad Speaker/Dock. *must be a supported iDock with 30pin
2. Make sure the Speaker/Dock is in iPod/iPhone/iPad mode if required
3. In some Speaker/Dock there will be a short sound confirming the device is connected, the adaptor will now automatically go into pairing mode. In this mode the Red and Blue indicator light will shine alternately to commence the pairing action.
4. Turn on the Bluetooth function on your Bluetooth device you want to use to stream the music.
5. Search for the Bluetooth device named **"AirBeatz iDOCK"**
6. Connect to this device, if required to enter a number code to connect please use **"0000"**
7. The blue indicator will now flash 4 times quickly, then 4 times quickly again while it is connecting. Once connected the blue light will flash slowly.
8. Ensure the music on your device is playing and volume is turned up.

9. Now you can enjoy your music wireless via the Bluetooth Adaptor, make sure the distance between the mobile and the adaptor is within 10m without any obstacles

Note: The adaptor will only connect one device at any time, to connect to a different device, first disconnect the paired device, the adaptor will automatically go back into pairing mode. Follow the above procedures to connect to a new device.

Using the Bluetooth Adaptor

When the music is being played through the Bluetooth adaptor, you can press the circle button to pause the music if required.

Note: The adaptor will go into standby mode when it is not used for a period of time, press the circle button on the adaptor and it will resume working.
